

Language guide to communicate with Aurora

Made by AlexDev

Manual for Using Keywords with the Aurora Virtual Assistant

This manual will guide you on how to effectively interact with the Aurora virtual assistant using specific keywords. Keywords allow Aurora to understand and respond to your requests accurately and efficiently, **so it is necessary to use it within a sentence so that Aurora understands the instructions**. Below is how to use these keywords in different contexts:

1. Searching for News (newsSearch)

To get the latest news, you can use the following phrases:

- "Search for news"
- "Find news"
- "Tell me the news"
- "I want to know the latest news"
- "Show me today's headlines"

Example:

- **You:** "Search for news about technology"
- **Aurora:** "Here are the latest news articles about technology..."

2. Performing Online Searches (onlineSearch)

To have Aurora perform internet searches, use these keywords:

- "Search"
- "Google"
- "Explore"
- "Consult"
- "Investigate"

Example:

- **You:** "Search for Italian cooking recipes"
- **Aurora:** "I found several Italian cooking recipes for you..."

3. Opening Utilities (openUtilities)

To open applications or utilities, use the following phrases:

- "Open"
- "Start"
- "Execute"
- "Activate"
- "Launch"

Example:

- **You:** "Open the calculator"
- **Aurora:** "Calculator opened."

4. Closing Utilities (closeUtilities)

To close applications or utilities, use these keywords:

- "Close"
- "End"
- "Finish"
- "Shut down"
- "Stop"

Example:

- **You:** "Close the browser"
- **Aurora:** "Browser closed."

5. Setting Alarms (putAlarm)

To set alarms, you can use these phrases:

- "Set"
- "Establish"
- "Schedule"
- "Configure"
- "Create"

Example:

- **You:** "Set an alarm for 7 AM"
- **Aurora:** "Alarm set for 7 AM."

6. *Getting Weather Information* (*wheaterUtilities*)

To get the weather forecast, use the following keywords:

- "Weather"
- "Weather forecast"
- "Temperature"
- "Weather conditions"
- "Current weather"

Example:

- **You:** "What's the weather like today?"
- **Aurora:** "The current temperature is 25°C with clear skies."

7. *Greetings* (*greeting*)

To start a conversation with Aurora, use these greetings:

- "Hello"
- "Hi"
- "Good morning"
- "Good afternoon"
- "Good evening"

Example:

- **You:** "Hello Aurora"
- **Aurora:** "Hello, how can I help you today?"

Additional Tips

- Always use clear and direct keywords so Aurora can better understand you.
- Combine keywords with specific details to get more accurate responses.
- Feel free to ask follow-up questions if you need more information or if the response is not clear
